DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6, and new claim 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In re amended claim 1, the "plurality of times" [also, spelling error] is unclear in view of the disclosure, since ref. 30, are pins, not tines.

In re claim 4, "a plurality of pins" already disclosed in the amended claim 1, as noted above. Therefore, introducing another set of the same elements is confusing. It is also noted, that "the threshed produce" either lacking positive antecedent basis, or should be "crop material."

In re claim 7, the driver element is in a form of a "spiral" is confusing, since the amended claim 1, already introduces that the drive element is in a form of at least one helical element (also, the same supported by the disclosure).

Claim Rejections - 35 USC § 102**Claim Rejections - 35 USC § 102**

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3-6, and new claim 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Gyspeerd (6500063).

Gyspeerd (6500063) discloses:

The claimed features are best illustrated for clarity in the following marked up drawings.

5. Claims 1-6, and new claim 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Cromheecke et al (4946419).

Cromheecke et al (4946419) discloses:

The claimed features are best illustrated for clarity in the following marked up drawings. Similarly to Gryspeerdt, only elements which are different are pointed out:

Response to Arguments

6. Applicant's arguments filed 10/25/2004 have been fully considered but they are not persuasive.

It is noted that the Applicant discloses that the helical element can be other driver element that may be used to accomplish the same function of driving the threshed crop material towards the rear portion of the rotor, and the above prior art both disclose element which can accomplish the same function.
